

Pallet & Packing Case Materials

James Jones & Sons is one of the largest producers of timber specifications for the pallet & packaging industries.

With a single shift output of 100,000m³, Lockerbie 1 is the only sawmill in the UK dedicated to processing logs of a smaller dimension targeted at the pallet and case-making industries.

Size and scale matter, but what's equally important is commitment. Uniquely, James Jones & Sons maintains a commitment to the pallet market 12 months of the year, throughout the year, every year.

Palletwood

Choose from a comprehensive range of **pallet boards**, **bearers** & **block-wood** including Euro sets.

Packing Case Materials

Choose from a comprehensive range of **boarding** specifications.

- ▶ FSC mixed 70% TT-COC-1503
- ▶ Heat Treatment (ISPM 15 56/30)
- ▶ Kiln drying
- ▶ Preservative treatment – Tanalith® "E" / Osmose® AC500 (To the appropriate use classifications)
- ▶ Anti-Stain treatments (Anti Blu)
