

James Jones in JJI-Joist export deal

Scottish I-joist producer James Jones & Sons Ltd has signed a partnership deal to export its JJI-Joist to mainland Europe for the first time.

The company's timber systems division is partnering with Belgian timber merchant VC Wood in a deal which will see the UK-manufactured, FSC-certified JJI-Joist sold initially in Belgium, southern Holland and northern France.

“It’s the next step for a product which has become a market leader in the UK and achieved genuine industry recognition,” said Mark Tilston, business development manager for James Jones & Sons’ timber systems division.

As well as supplying the product, VC Wood is also using the product in its upcoming Passivhaus project.
