

Economy Grade

Cost-effective and versatile.

Economy Grade timber can be used for a variety of applications, including packing case manufacture, pallets, formwork, fencing, site pegs and a host of additional applications.

Derived as downgrades from our strength grading process, stocks of most standard carcassing sections accumulate on a daily basis.

All our Economy Grade stocks are kiln dried and heat treated, satisfying the requirements of ISPM 15 56/30, at a competitive price.

Although our lowest grade specification offering extremely good value for money, Economy Grade is subject to the same stringent quality, presentation and packaging control procedures that differentiate all James Jones products.

- FSC mixed 70% TT-COC-1503
- Cost-effective
- Versatile
- Available in a range of standard cross sections
