

ENGINEERING SUPERVISOR (ELECTRICAL / MECHANICAL)

(3 Shift Pattern, including some weekend work)

Stevens Croft , Lockerbie, Dumfries & Galloway

James Jones & Sons Ltd is one of the UK's largest timber companies with core activities in sawmilling, I-Joist and pallet manufacture. We operate five sawmills throughout Scotland; an engineered wood manufacturing plant in the north of Scotland and have pallet and packaging operations at ten sites across the UK. We have recently invested in a new timber processing and distribution centre, close to our Lockerbie site. As part of these expansion plans we are looking to develop our engineering team at Lockerbie.

The successful candidate will have a proven track record as an electrical or mechanical engineer preferably in a production related environment. Experience of working with three-phase motors and control systems, PLCs, hydraulic and pneumatic systems is desirable. Although supervising you will also work as part of the maintenance team in preventative maintenance, fault finding and breakdowns as required.

Responsibilities

- You will be responsible for the efficient and effective organisation of a small team of engineers.
- Reporting to the site engineering manager, you will be responsible for planning and distributing tasks to ensure planned maintenance is achieved for the mills to run effectively.
- You will monitor and implement health and safety procedures, ensuring we continue to promote a safety conscious environment.

Key Skills

- Communication skills, both verbal and written
- Computer literacy
- Numeracy
- Well organised
- Flexibility

Planning skills would also be desirable

We offer an attractive remuneration package including pension scheme. Applications together with a CV (stating current salary) should be sent to: Donna O'Connor, HR Manager, James Jones & Sons Ltd, Broomage Avenue, Larbert, Stirling, FK5 4NQ or email:

recruitment@jamesjones.co.uk.

Previous applicants need not apply.
